Conducted by: NORC at the University of Chicago
Sample Source: AmeriSpeak Probability-Based Panel and non-probability panel respondents, calibrated using TrueNorth
Sampled Population: General population 18+

*This survey was also in Spanish and English, but only the English is represented here. AmeriSpeak's standardized introduction and thank you informational screens are not included below. Finally, this is a TrueNorth survey that included non-probability panelists. These non-probability panelists were asked a series of demographic profile questions that were not asked of AmeriSpeak panelists because that information was already on file. At the end of the document, all of the demographic, socio-economic and household profile measures that have been asked of AmeriSpeak prior to the survey and included with the final delivered data are noted.
Thank you for agreeing to participate in our new AmeriSpeak survey!

This survey is being conducted on behalf of University of California San Diego’s Center on Gender Equity and Health (GEH). The goal of the survey is to understand and address health, economic security, and violence among California residents.

Difficulties in life, including violence, can happen to anyone. We want to understand better the different ways violent experiences and other difficult experiences, such as discrimination or economic insecurity, occur and what we can do to help with prevention and support. While taking this survey, please think about all the experiences you have dealt with in your life regarding these specific situations. Your answers to the questions will be strictly confidential.

To further protect the privacy of participants in this study, NORC has obtained a Certificate of Confidentiality. This information is available to AmeriSpeak panelists at: https://www.amerispeak.org/privacy. NORC can use this Certificate to legally refuse to disclose information that may identify you or your minor child in any federal, state, or local civil, criminal, administrative, legislative, or other proceedings, for example, if there is a court subpoena. NORC will use the Certificate to resist any demands for information that would identify you, except as explained below.

The Certificate of Confidentiality does not prevent disclosure to state or local authorities of child abuse and neglect, or threats to self-harm or to harm others.

If you have any questions or concerns about this study, you can contact AmeriSpeak support at support@AmeriSpeak.org or call (888) 326-9424.

The survey will take approximately 15 minutes, on average. Since some of the questions are personal, we suggest that you be in a private setting during the survey.

There are minimal benefits or risks to being in this voluntary study. In order to keep your information private, the answers you give us will be combined with the answers from other people who are in the survey. No information that could personally identify you will be given to our organization or anyone else. You can skip any question or stop the survey at any time.
